

The Tale of Two Trajectories

The growing disconnect between evolving needs and perceptions of students, and the academic services designed to support them.

*The University's
most reliable
services are
disappearing
from student
awareness*

**LMS is the most used service (4.96),
but ranked 6th in importance (3.92).**

Why does this matter to the CIO?

This project is meant to support a CIO-led initiative to ensure that digital services are not only functional – but visible, valued, and aligned with user needs. With millions invested in Wi-Fi infrastructure, ERP systems, and academic technology, leadership needs to know:

- Is the university meeting the evolving expectations of students, faculty & staff?
- Has the university's post-pandemic investments paid off?
- Which services are driving satisfaction?

Strategic Goals...

Investment Validation

Post-COVID transformation

Strategic Planning: master plan, outreach, engagement

BUSINESS CONTEXT

Data Source

- MISO surveys
- 2018, 2021, 2024
- Students, Faculty, & Staff

Data Cleaning

- Python
- Removed unnecessary columns
- "-99" treated as missing value
- Averages files
- Student files concatenated

DATA & METHODOLOGY

Perception, not performance, is driving disconnection.

There is a growing disconnection between the evolving needs and perceptions of students, and the academic services designed to support them.

Classroom tech usage rose steadily

(+10%)

post-COVID

CENTRAL INSIGHT

Importance vs. Satisfaction

The diverging bar chart reveals the largest discrepancies between importance and satisfaction across services.

STUDENT DISCONNECT

Importance of Key Digital Services Is Declining

Despite steady satisfaction levels, importance scores drop — a red flag indicating potential disengagement or lack of awareness.

- Library Database
- Available Wi-Fi on Campus
- LMS
- ITS Online Info & Service

Library databases dipped from

4.2 to 3.8

over 6 years

PERCEPTION OVER TIME

Essential services may be taken for granted

Perception Gap

USAGE VS. IMPORTANCE

Awareness Campaigns:

Reintroduce essential but overlooked services through relatable, student-centric messaging

Service Storytelling:

Highlight real use cases and outcomes & how these tools support academic success

Student-Led Engagement:

Involve student ambassadors or peer tech reps to advocate for tools & normalize their value

Service Visibility on Digital Platforms:

Integrate service information into portals students already use to reinforce awareness

RECOMMENDATIONS

Don't let essential services fade into

INVISIBILITY

Strong systems aren't enough. Perceived value drives engagement, funding, and impact.
