## SUMMARY

Data analyst who turns complex, multi-source data into clear reporting and recommendations that inform decisions. Strong in SQL, Power BI, Tableau, and Excel, comfortable explaining findings to technical and non-technical audiences.

## EDUCATION

### Northeastern University

Master of Science in Business Analytics, GPA: 3.63

Boston, MA

Sep 2024 – Dec 2025

### Sastra Deemed University

Bachelor of Technology in Mechanical Engineering

Thanjavur, India

Jul 2019 – Jun 2023

## EXPERIENCE

### Business Operations Analyst

Bharat Petroleum Corporation Limited, Authorized Dealer

Remote, Boston

Jan 2024 – Aug 2025

- Drove a turnaround from monthly loss to **23.3% annual ROI in four months** by building Power BI dashboards (DAX measures, back-end data models) that surfaced a hidden margin gap
- Built automated reconciliation routines across four source systems that kept reporting accurate across **120+ daily KPIs**, using SQL to join and validate data
- Applied demand forecasting and statistical analysis in Excel (Power Query, VBA) to guide inventory and pricing, holding a **4-day inventory cycle with zero stockouts** across \$96K monthly procurement
- Partnered with operations, finance, and supply stakeholders to gather requirements and turn findings into recommendations leaders could act on

### Graduate Teaching Assistant

D'Amore-McKim School of Business, Northeastern University

Boston, MA

Sep 2025 – Dec 2025

- Supported **190+ graduate and undergraduate students** as the go-to person for SQL, Python, and Excel questions, explaining analytical concepts to a mixed-skill audience
- Reviewed and validated student queries and models each week, catching logic and data-quality issues and walking people through the fix

### Data Analyst Intern

Mahindra & Mahindra Limited

Pollachi, India

Aug 2023 – Dec 2023

- Ran a data analysis study across 13 conditions (ANOVA, hypothesis testing, regression) reaching **97.33% R<sup>2</sup>** and documenting findings that informed a **30% improvement in output quality**

## PROJECTS

### Customer Propensity Modeling & Segmentation | Python, XGBoost, LightGBM, Scikit-learn

Sep 2025 – Dec 2025

- Built machine learning models on **318,000+ records** with a 0.1% positive class, cleaning a 53.9% incomplete dataset and engineering features to reach **37.7% capture** in the top 1% tier
- Designed a segmentation framework that cut outreach volume by **90%** while keeping nearly all of the highest-value group

### Ride Fare Prediction & Data Pipeline | Python, PySpark, SQL, Google BigQuery, Flask

Dec 2024 – Apr 2025

- Engineered a pipeline on Google BigQuery over **690K+ records**, using PySpark to cut query latency from **4 min to 12 sec**
- Built and validated machine learning models to **\$6.69 MAE** with feature engineering and cross-validation, served through an interactive Flask dashboard

### U.S. Airfare Trend Analytics | Tableau, SQL, Python, Excel

Sep 2024 – Dec 2024

- Analyzed airport-level U.S. airfare data (BTS, 2018–2024), normalizing nominal and inflation-adjusted fares, and built **11 interactive Tableau visualizations** of pricing and volume trends across states, cities, and airports

## TECHNICAL SKILLS

**Languages & Querying:** SQL (Joins, CTEs, Window Functions, Query Optimization), Python (Pandas, NumPy, Scikit-learn, XGBoost, LightGBM), R

**BI & Visualization:** Power BI (DAX, Data Modeling), Tableau, Excel (Pivot Tables, Power Query, VBA), Dashboard Development, KPI Reporting, Data Storytelling

**Data & Automation:** ETL, Alteryx, Google BigQuery, PySpark, Multi-Source Integration, Data Cleansing, Data Validation & Reconciliation

**Analysis & ML:** Descriptive & Predictive Analytics, Regression, Classification, Segmentation, Forecasting, Feature Engineering, ANOVA, Hypothesis Testing

## VOLUNTEERING

### Data Analyst

Street Care

Remote, Boston

Mar 2026 – Jul 2026

- Maintain monthly Android and iOS download data for two of the nonprofit's apps and build Excel dashboards tracking adoption, ratings, and year-over-year growth, summarizing the trends for the team
